FLEET MANAGEMENT

Maximize Uptime and Minimize Costs With DEVELON Fleet Management.

DEVELON Fleet Management gives you access to vital equipment data that will help you make informed decisions that can positively impact productivity and profitability. The system monitors important and relevant information to help you maintain your equipment and reduce equipment-related expenses.

This telematics system from DEVELON links your computer, tablet or mobile device to your equipment. So anywhere you have an internet connection, you have access to real-time information about your machines.

Alerts on Your Schedule
Unlike other manufacturers' telematics systems, DEVELON Fleet Management lets you decide which alerts you see and when. See page 8 for more information on alert customization.

Here's How It Works

From the DEVELON Fleet Management app or website, you have on-demand access to the information you need:

- ☑ Equipment service needs
- ☑ Operator productivity analysis
- ☑ Machine location
- ☑ Fuel consumption and more

SMART X CARE™

Get added peace of mind with Smart X-Care™ machine monitoring.

Let us do the work for you to help protect your equipment investment. Our team of heavy equipment specialists actively tracks your construction equipment telematics from our secure, state-of-the-art machine monitoring center and alerts you and your dealer as needed.
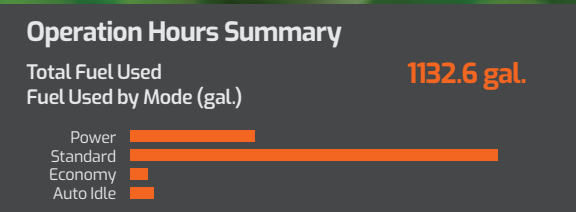

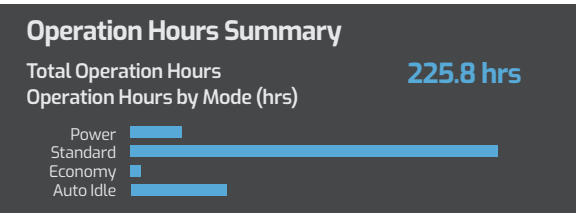

A Partner in Achieving Maximum Uptime.

You will know when maintenance is due — to help prevent unexpected breakdowns and expenses. When you get a warning light, you can work with your dealer to determine next steps. If you need field service, the tech will arrive already understanding the problem. At each step of the way, DEVELON Fleet Management will help save you time and minimize your equipment downtime.

Proactive Diagnostics and Dispatching via Smart X-Care Machine Monitoring

| Dealer is alerted about a fault code on your machine. | Dealer calls you and explains the issue. | Dealer sees your location and immediately dispatches field service truck with the right part. | Field service tech arrives knowing the problem and installs the part. | Your operator gets back to work. |

Monitor How Equipment Is Being Operated.

Is your machine digging or sitting idle? You'll know how your machine is utilized with DEVELON Fleet Management's analysis of idle vs. working time along with a detailed breakdown of hours by power mode.

DEVELON Fleet Management enables you to easily pull reports showing how much time your machine spent in each of its working modes, and how fuel efficiency changed throughout the day. You can use this data to compare operators across shifts and implement additional training if necessary.

# Reduce Risk of Fuel and Equipment Theft.

You can use DEVELON Fleet Management to create invisible fences to help stop unauthorized use of your equipment. You can also monitor your machines' fuel levels in real time. These features are powerful tools that give you peace of mind about your fleet's security.

SECURITY FEATURES INCLUDE:

Geofences
Map GPS boundaries for where your equipment should and should not be.

Time Fences
Set the days and times your equipment should be running, and get alerted if a machine is running when it shouldn't be.

Fuel Level Monitoring
Receive an alert if the fuel level in a machine drops 25% or more in less than an hour.
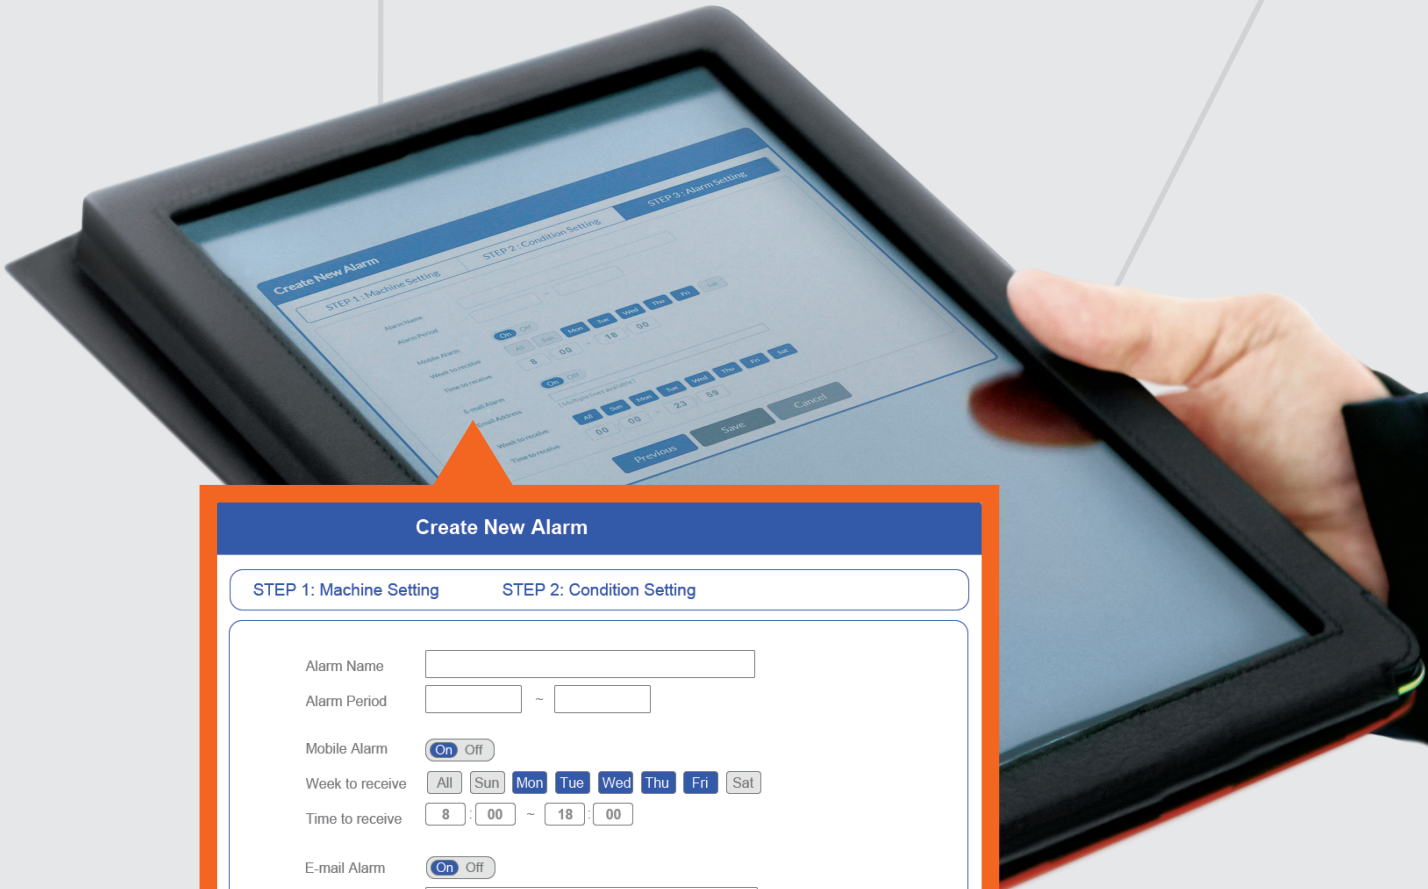

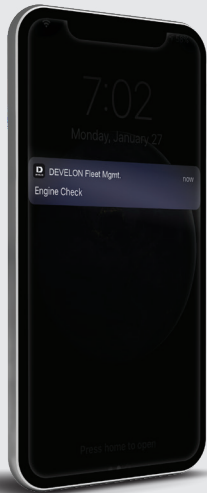

ALERT!

Customize Alerts To
Match Your Preferences.

If you get too many alerts, you may start to ignore them. With DEVELON Fleet Management, you manage how many alerts you get and when you get them.

You may only want to be alerted of upcoming maintenance Monday through Friday, 8 a.m. to 5 p.m., but you want to be alerted of a machine running outside of a time fence 24/7. With DEVELON Fleet Management's My Alarm system, you can set up your alerts to be as specific as you choose.

You decide the specific instances when you should be alerted. You decide whether you receive the alert via email or mobile app notification. You can also set up alerts for different people in your company. DEVELON Fleet Management gives you flexibility to make the system work the way you need it to.

Generate Reports That Matter.

DEVELON Fleet Management makes it simple to analyze overall fleet performance.
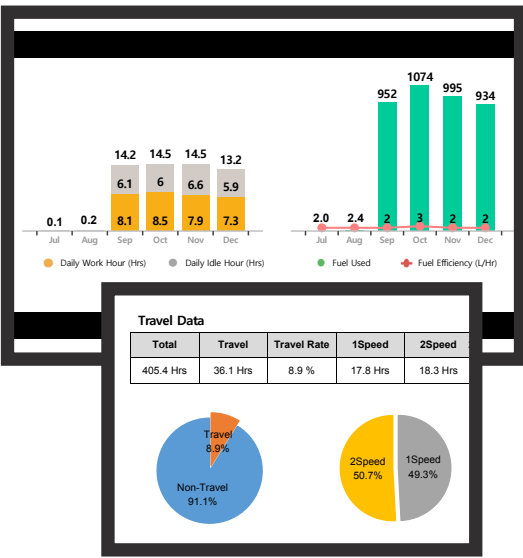

With a few clicks, you can quickly pull equipment reports for individual machines that analyze fuel consumption, operating hours and working/idle time. This report also breaks down how hard a machine is being worked, giving you valuable insight into operator performance.

The fleet report gives similar information, showing data for your entire fleet combined with data about the number of machines with overdue or upcoming service intervals.

The information is there whenever you need it — in reports that make it easy to make decisions, increase productivity and improve uptime. Reports can be automatically generated and emailed to you each month for timely access to valuable data.

Equipment Reports

Protect Equipment Resale Value.

Your equipment's resale value can be dramatically improved by utilizing DEVELON Fleet Management proactively.

It can help preserve your equipment value by reminding you to service your machine on time while also saving a detailed service history after each serviceable item is replaced.

This system helps reduce unnecessary usage by providing information about idle vs. working time, allowing you to make changes to the way your crew may be operating the machine.

DEVELON Fleet Management not only helps you save money in the short term, but can help make you money in the long term.

Get DEVELON Fleet Management.

You will receive DEVELON Fleet Management for the life of the machine with your purchase of any new eligible DEVELON equipment. Cellular coverage is included for the life of the machine. Satellite coverage is included for 36 months at no cost.*

Contact your authorized DEVELON dealer to schedule a demo of DEVELON Fleet Management, for help accessing it, or for training on the system. Start uncovering ways to save money and improve your business with machine data today.

Satellite coverage not available on mini excavators.
